AFRICAN AMERICAN INTERIOR DESIGNERS

AFRICAN AMERICAN INSPIRATION

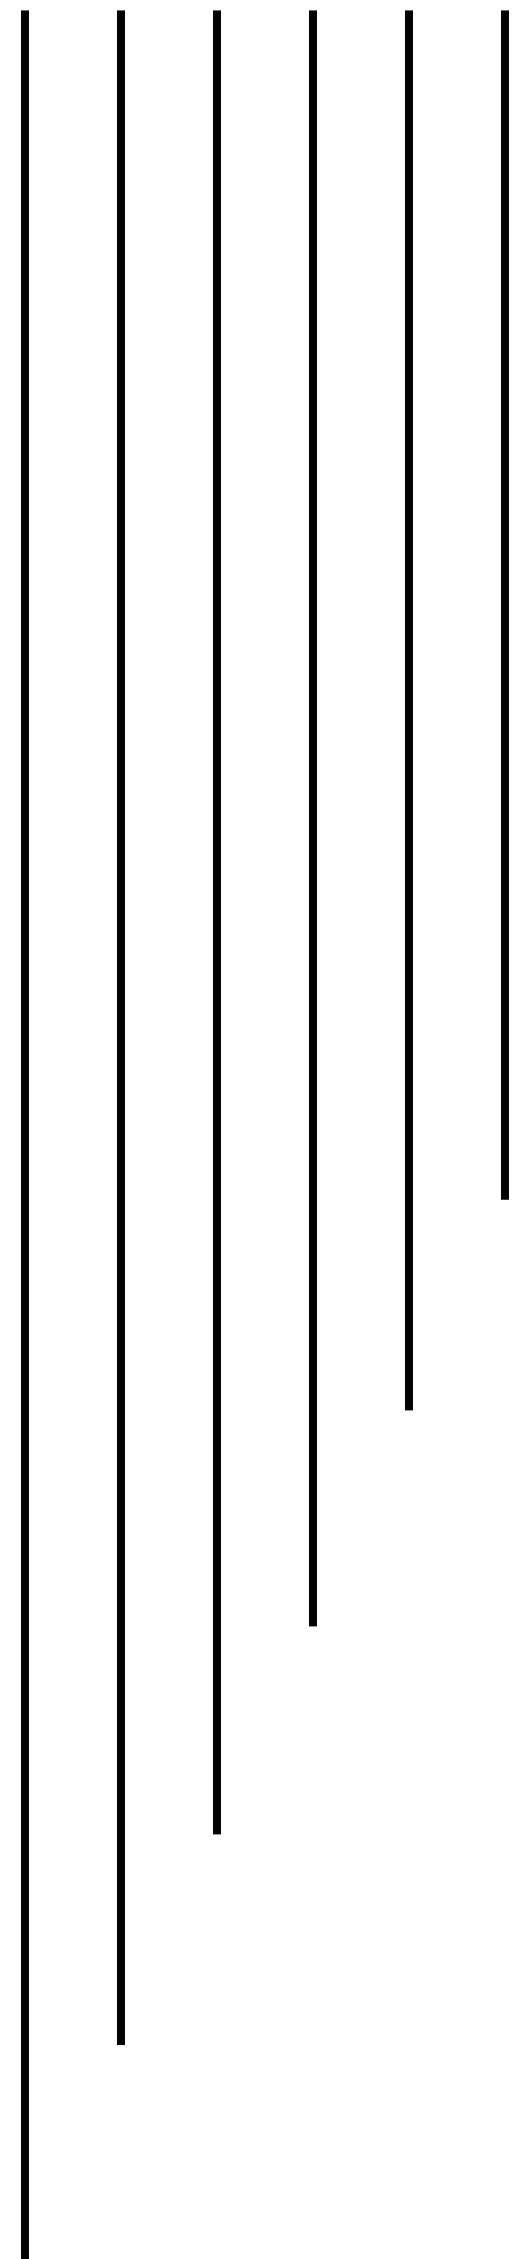

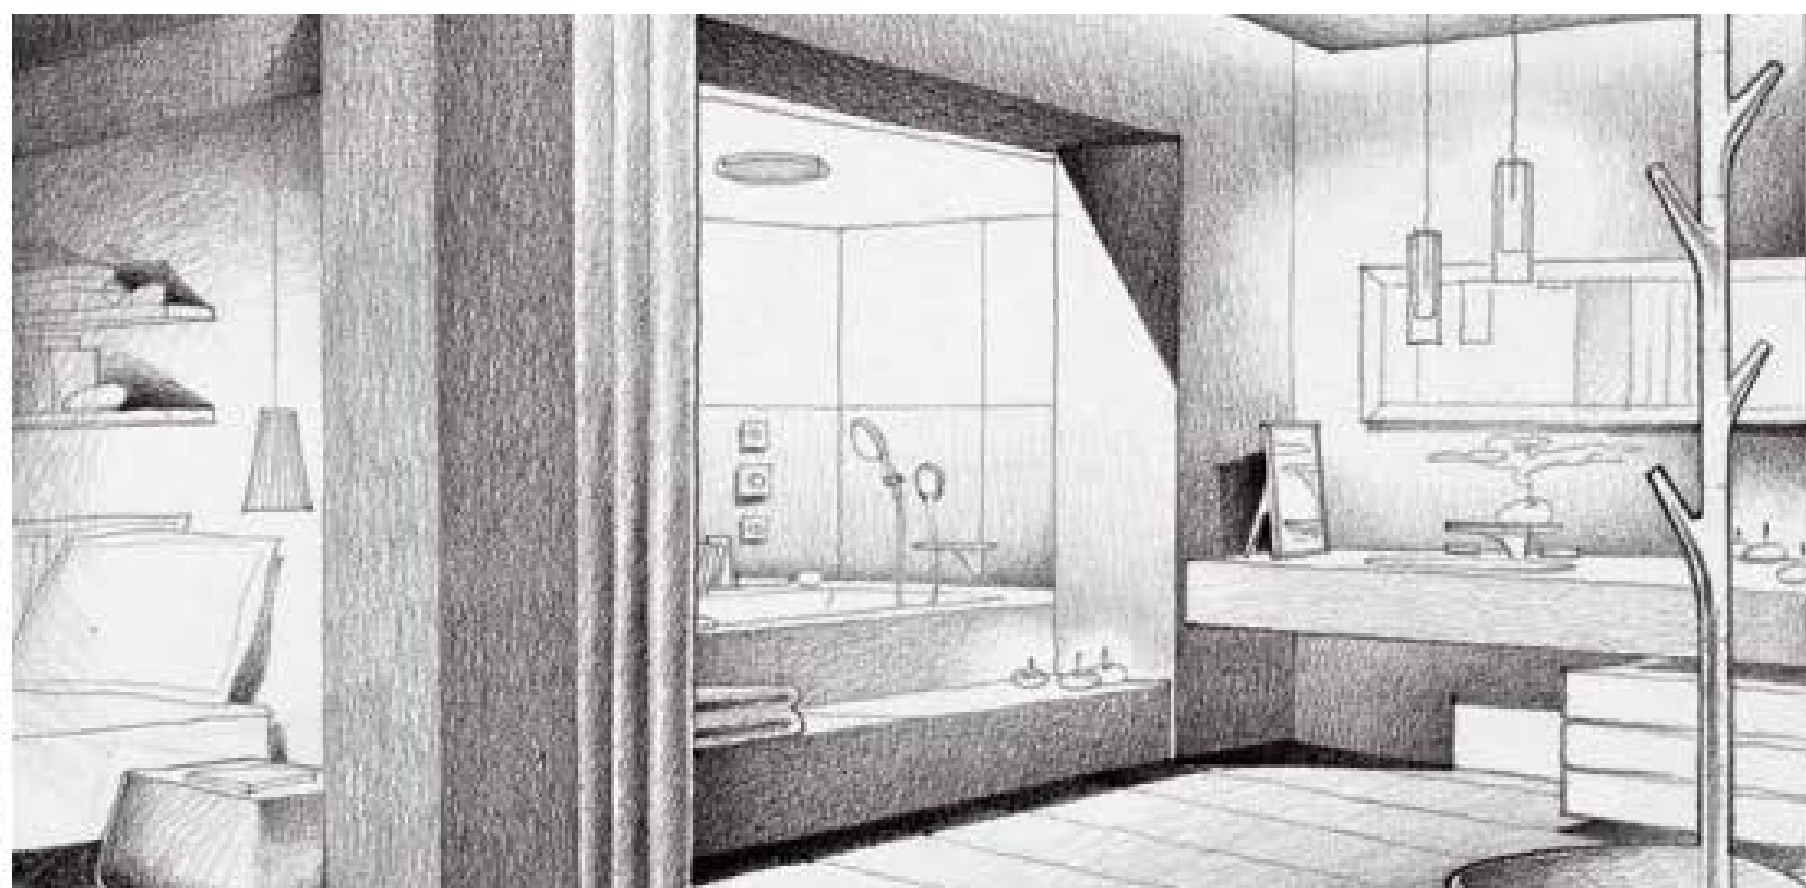

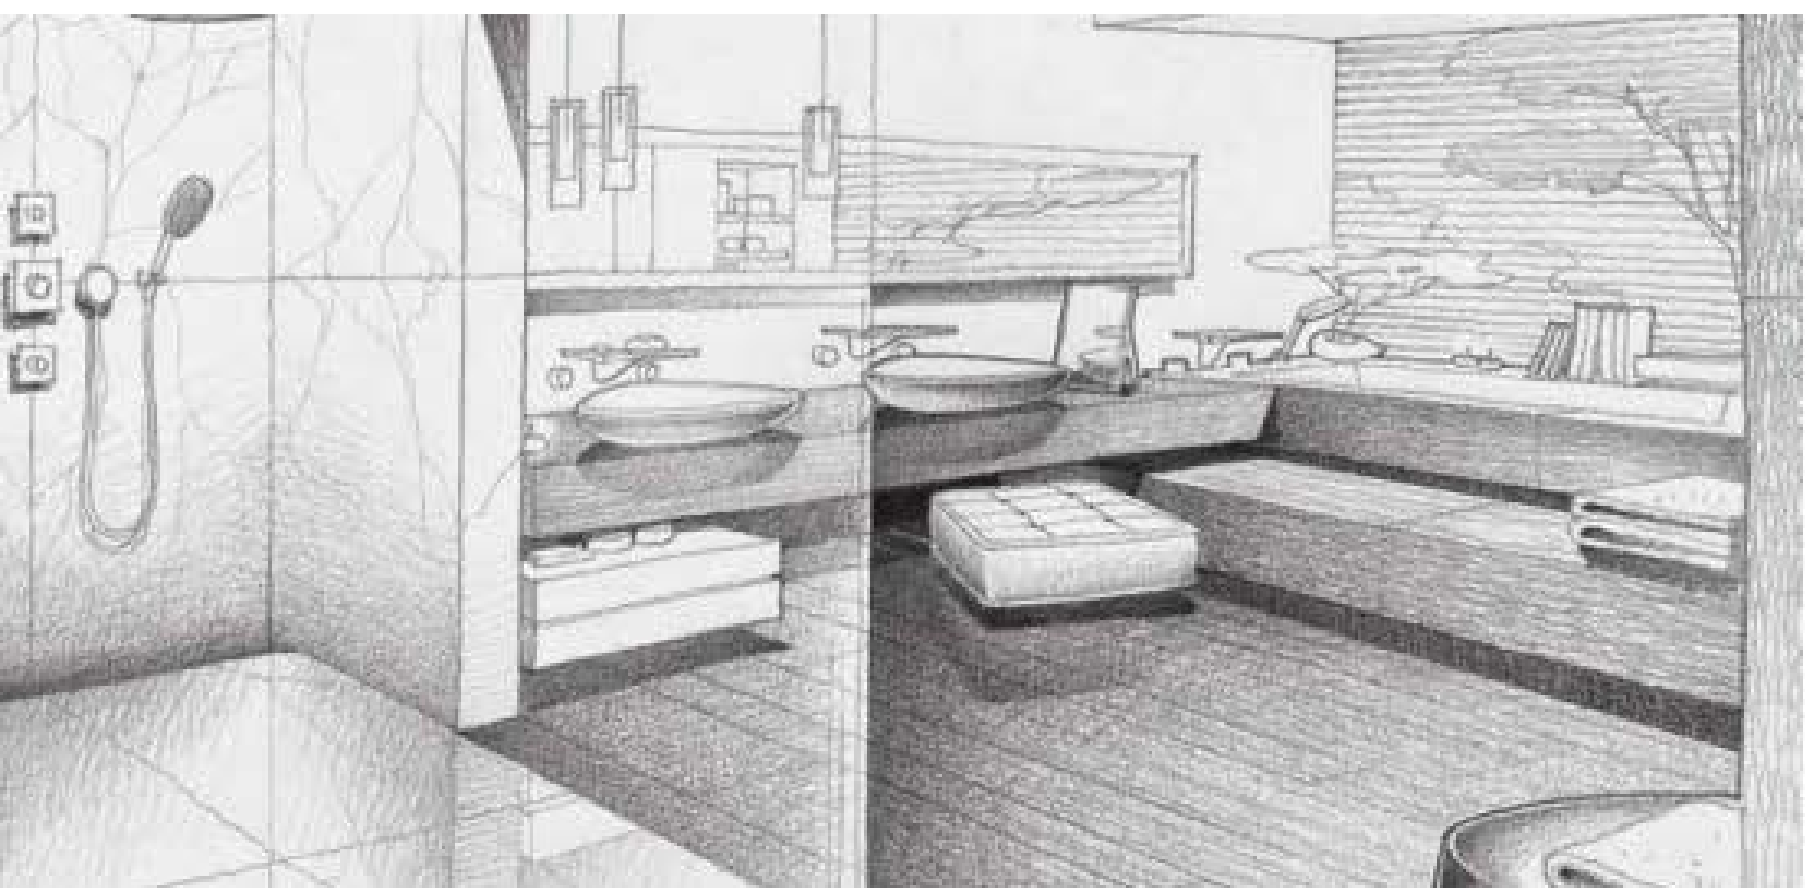

A sofa works well to divide a room into separate areas. Use the back of the sofa as a divider, placing other furniture against it, eg, a sofa table. Chests, buffets, & bookcases can also serve as room dividers.

Lighting -
Place a lamp next to every chair or seat for adequate reading or working light. A table or flat surface should be within easy reach of every seat.

Create a Spacious Look -
If rooms are small, a spacious look can be created by using lightweight furniture with slender legs & open arms. Arrange furniture close to the walls to open up the floor space & avoid too many small accessories. A large mirror can work wonders to create the illusion of doubling the size of the space.
